Narcisse Jemba

Full-stack Developer @ Web IT

Communauté urbaine de Douala, Région du Littoral, Cameroun

Résumé

Hi! My name is Jemba, and I'm a full-stack software engineer who specializes in using Javascript, React, Redux, and Rails to build software solutions for small businesses.

I studied mathematics and computer science at the University of Paris 7. I have been passionate about programming for several years now. I have experience with most software languages, C sharp, java, or web backend languages or framework php, django, kohana, laravel, nest js... Or frontend, Javascript, react, angular. I also have experience in mobile development, android, swift, objective c, react native..

I'm currently completing coursework at Microverse, a remote software development that allows devs from all over the world to pair-program and build projects together. I've spent the last several months completely immersed in remote development, working on a number of projects: APIs, a desktop delivery app for a local restaurant chain, building everything from landing pages to Rails APIs.

I've spent the last several months working remotely and asynchronously with people across five different time zones . So I love talking with other devs, feel free to connect if you'd like to chat.

Expérience

Microverse

Mentor (Volunteer)

avril 2023 - Present (1 an 6 mois)

San Francisco, California, United States

Mentored junior web developers, providing technical support through code reviews.

Proposed improvements to code organization to improve code quality and overall performance.

Provided advice and tips on how to maintain motivation to maintain longevity in the program.

Web IT

Full-stack Developer

juin 2022 - Present (2 ans 4 mois)

Cameroon

I was elected the best developer of my team.

Due to my mathematical degree I detect bugs quite quickly in very complex systems .I was tasked to do this in an angular - nest project with multiple technologies .
